PRE-ADMISSION TESTING CLOSURE NOW ON HOLD

On June 13, 2017, CWA was at the Oversight Committee meeting when Kaleida Health announced their plans to close PAT @ BGMC & MFSH, leaving us with a call center at DMH. CWA1168 and the PAT staff held three separate meetings at the union hall to review Kaleida's plan. CWA and the PAT staff sat down and researched how this closing would affect daily operations, job positions, and patient services. There were 21 job positions that were at risk of being eliminated. After the research was completed the PAT staff and CWA sat down with management from Kaleida Health and reviewed our findings. After management was presented with the findings, they decided not to move forward with their plans. The PAT staff took action and participated in this action. Together with the PAT staff CWA was able to make a difference.
